

2. Specific questions:

No.	I. Company Name	II. Managing Company	III. Business Unit	IV. Shareholders	V. Country	VI. Operation
Anglo American Managed Operations						
25	Anglo American/ Metallurgical Coal	Anglo Coal (Capcoal Management) Pty Ltd	Coal Aus	Anglo Coal (German Creek) Pty Ltd Jena Pty Ltd Mitsui German Creek Investment Pty Ltd	Australia	CapCoal

1. "Tailings Facility" Name/identifier	2. Location	3. Ownership	4. Status	5. Date of initial operation	6. Is the Dam currently operated or closed as per currently approved design?
Capcoal / Pit F Mine affected water	22.965 S, 148.560 E	Operated by Anglo American for JV partners	Inactive (See comments in Q20)	2019	Yes

7. Raising method	8. Current Maximum Height (m)	9. Current Tailings Storage Impoundment Volume (m ³)	10. Planned Tailings Storage Impoundment Volume in 5 years time (m ³)	11. Most recent Independent Expert Review	12. Do you have full and complete relevant engineering records including design, construction, operation, maintenance and/or closure.	13. What is your hazard categorisation of this facility, based on consequence of failure?	14. What guideline do you follow for the classification system?	15. Has this facility, at any point in its history, failed to be confirmed or certified as stable, or experienced notable stability concerns, as identified by an independent engineer (even if later certified as stable by the same or a different	16. Do you have internal/in house engineering specialist oversight of this facility? Or do you have external engineering support for this purpose?	17. Has a formal analysis of the downstream impact on communities, ecosystems and critical infrastructure in the event of catastrophic failure been undertaken
Other, See Q20 for more information	NA	0	7414	2019	Yes, excluding const report, to be completed by Aug/Sept 2019	Significant / Moderate	Queensland - Dept. of Env & Science/ Anglo American Technical Standard (AA TS 602 001)	No	Both	Yes, CCS completed

18. Is there a) a closure plan in place for this dam, and b) does it include long term monitoring?	19. Have you, or do you plan to assess your tailings facilities against the impact of more regular extreme weather events as a result of climate change, e.g. over the next two years?	20. Any other relevant information and supporting documentation. Please state if you have omitted any other exposure to tailings facilities through any joint ventures you may have.
Yes, Yes	Yes.	<p>Q4: Pit F has mine affected water at the present. However, it is planned to pump this water to another Pit and commence to use this Pit for tailings storage from July/August 2019, following site water balance modelling.</p> <p>Q6: July/August 2019 onwards</p> <p>Q7: In Pit storage</p> <p>Q17: Pit F is below natural ground level. Nevertheless, the formal analysis of downstream impact was undertaken in line with Anglo American Standards, for Pit F.</p> <p>Q18: - Closure Plan is outlined in "Capcoal Surface CAP_ENV_8.0066_TMP - Tailings Management Plan". This plan is at concept stage, however the level of detail will be increased to this plan, as the closure date becomes nearer.</p> <p>Q19: Plan in place in line with Anglo American's Long-term Sustainable Mining Plan.</p>
